

# ARTLANTIS STUDIO

## Artlantis for students

## PRESS RELEASE

May 22, 2007 - Paris, France

### We offer them their future, now.

Since the beginning of May, 70 licenses of Artlantis Studio have been installed in the computer lab of the Department of Architecture at the University of Pretoria, thanks to our distributor in South Africa, Mr Athol Phillips, the Executive Member of Autograph Design Technologies. Therefore, 70 students will use the software on specific projects, with the support of their teacher. With the University of Cape Town and the Durban University of Technology (Department of Interior Design), there are altogether 180 licenses offered to architectural schools in South Africa.

*"I would like to thank Artlantis for this wonderful opportunity given to our students in providing them with Artlantis Studio as an educational tool. (...) They are enjoying working with Artlantis and finding it very easy to use. The Sketchup Artlantis link is also wonderful to use in their fast track design schemes. The students that I lecture consist of Architecture students as well as Interior Architecture students making it a vibrant group to teach exploring your program to the maximum".*

**Leon Pienaar, lecturer, Department Architecture, Pretoria University, South Africa.**

#### Why do we offer Artlantis ?

Today they are students in architecture, design or city planning, and tomorrow they will work for real. Why not considering them as professionals already ? That's what we do. By offering the students FREE Artlantis Studio serial numbers for one year, we express our conviction that school conditions should be similar to the professional ones. That's why this offer includes a full commercial license without any functional limitation. We believe that builders of tomorrow need the best technological, educational and financial existing tools, in order to learn and open their way to their future.

**Since october 2006, when we first launched our special educational offer, more than 216 schools and 12 000 students have been equipped with Artlantis. Thanks to our partnership with Graphisoft and its strong education policy, they are all students from 216 universities, architecture and design schools from all over the world, from Finland to Poland, China, Brazil, Germany, South Korea or Mexico...**

#### How to get it ?

Students are invited to apply for free Artlantis studio at our local distributors, listed on our website <http://www.artlantis.com/buy/ipartners/index.php>

#### Artlantis, motion for emotion

---

**Artlantis** is a proven, stand alone rendering application, widely recognized for its ease of use, speed and efficiency.

**Chosen and recommended by most of the major CAD editors, Artlantis is today the favorite rendering solution of more than 65 000 users worldwide, available in 6 languages and 82 countries.**

**Artlantis Studio 1.2 reviewed in [www.macuser.co.uk](http://www.macuser.co.uk) in October 2006 :**

*"Artlantis, a rendering - and now animation - program from French developer Abvent, has always relied on a lateral-thinking approach to its tasks. The original version wowed 3D artists with its ability to drag and drop materials onto objects in a fully rendered 3D environment, then have those same objects' material attributes update in real time. This approach saved users from the endless apply-test render-tweak cycle and was a real breath of fresh air compared to the processor speeds of ten years ago."*

If you'd like to review our products, get some information or tips for your features, please contact us.

Founded in 1985, **Abvent Group** is a leader within the architecture and design fields (ArchiCAD, Artlantis, SketchUp Pro and HyperArchi), digital imagery (the Artlantis product family) and photography (VU' agency, and VU' gallery).
